FLORIDAGREEN® FERTILIZER

GUARANTEED AND SOLD BY
MB DISTRIBUTION, LLC
SPRING HILL, FL · F003741

BULK, SUPER SACK & BAGGED

LOWEST COST PER UNIT N

BASE FERTILIZER · SLOW-RELEASE NITROGEN AND SOIL AMENDMENT IN ONE PASS

FLORIDAGREEN FERTILIZER

5-3-0

PLUS 10% HUMIC ACID AND 16% ORGANIC MATTER AS CARBON

One of the best value nitrogens on the market, and it does more than feed. **4.0% of the 5.0% N is water-insoluble**, so it releases as soil biology works on it instead of leaching past the roots. Every application also lays down **10% humic acid, 1.30% fulvic acid and 16% organic matter as carbon**: you are amending the soil and fertilizing it in the same pass, at a cost per pound of nitrogen comparable to slow-release synthetic nitrogen.

80%
OF N WATER-INSOLUBLE, ALL DERIVED FROM SLOW RELEASE ORGANIC N

16%
ORGANIC MATTER AS CARBON

10%
HUMIC ACID IN EVERY BAG

FOR ROW CROPS, PASTURE AND HAY, CITRUS AND GROVE, SOD AND TURF, LANDSCAPE BEDS: ANYWHERE NITROGEN IS BOUGHT BY THE POUND AND SOIL NEEDS BUILDING

MADE IN SPRING HILL, FLORIDA

Best value
Lowest delivered cost per unit of nitrogen in the FloridaGreen line

Amends
Carbon, humic and fulvic acids build soil with every application

Slow
80% water-insoluble N releases with soil biology, not with the rain

Ca + Fe
2.5% calcium and 0.4% iron carried along at no added cost

TRUSTED BY GROWERS, RANCHERS, SOD FARMS, GROVE MANAGERS & TURF PROFESSIONALS

MORE THAN FERTILIZER

- **Nitrogen you are not paying twice for.** Priced against the unit of N, this is the cheapest nitrogen we sell, and the carbon, humic acid, calcium and iron ride along instead of being bought as separate products.
- **It stays where you put it.** Only 1.0% of the nitrogen is water-soluble. The remaining 4.0% is slowly available, mineralizing as the soil warms and works, so a heavy rain does not take the application with it.
- **Every pass builds the soil.** 16% organic matter as carbon feeds soil biology, and 10% humic plus 1.30% fulvic acid improve cation exchange and nutrient holding, so sandy Florida ground gets better season over season instead of staying flat.
- **Low salt index.** Less salt than synthetic fertilizer, lowering burn risk and salt buildup.

CLEAN & COMPLIANT

Pathogens tested monthly · all EPA, FDEP, USDA, FDA and TERD requirements met and passed · current certificate of analysis ships with every load · trusted by growers for 10+ years. Metals content info: aapfco.org/metals.htm

GUARANTEED ANALYSIS

REGISTERED LABEL VALUES

Total nitrogen (N)	**5.0%**	Calcium (Ca)	**2.5%**
Water-soluble N	**1.0%**	Sulfur (S)	**1.0%**
Water-insoluble N*	**4.0%**	Combined sulfur (S)	**1.0%**
Available phosphate (P_2O_5)	**3.0%**	Iron (Fe)	**0.4%**

ALSO CONTAINS NON-PLANT FOOD INGREDIENTS

Organic matter as carbon 16.00% · Humic acid 10.00% · Fulvic acid 1.30%

CAUTION Keep out of reach of children and pets. Breathing dust may be harmful; avoid contact with eyes and skin and wash hands after handling. Store cool and dry. Do not apply near water, storm drains or drainage ditches. Follow all local laws and regulations.

*4.0% slowly available nitrogen. Derived from biosolids. Values are registered label guarantees; every batch is tested.

AGRICULTURAL SPEC

Available in an agricultural spec that is the cheapest slow-release nitrogen source on the market.

DIRECTIONS FOR USE

Row crop & pasture
2,000 lb /acre
Delivers 100 lb N/acre. Broadcast and incorporate where possible

Turf & sod
8 lb /1,000 ft²
Delivers 0.4 lb N/1,000 ft². Water in after application

Landscape beds
10 to 15 lb /1,000 ft²
Broadcast over soil or mulch, water in. Some Florida areas restrict phosphorus on landscape plants; check local ordinance and soil test first.

Reapply
10 to 12 wk interval
During active growth; adjust to soil test

AVAILABLE IN

25 and 40 lb bags · 1,000 and 2,000 lb super sacks · bulk by the truckload · private label and custom blends
